I HAVE THREE XM RADIOS, ONE IN THE SEMI I DRIVE, ONE ON MY MOTORCYCLE AND A BOOMBOX IN THE HOUSE. WHEN WE GO ON A TRIP I PUT ONE IN THE PICK UP OR IN THE CAR. I pay for the programming every month and I think I am entitled to receive what I am paying for. There are times when it helps me greatly to know what is happening between me and my destination. If I know ahead of time I can change my routing to miss either bad weather or traffic snarls. Local stations don't tell you anything until you are too close to the problem to do any good. Besides benefitting myself it also helps cut down on traffic congestion thus possibly helping to prevent accidents and making law enforcement's job that much easier. I can't see where it is the job of the NAB to try to regulate this. Respectfully yours a tax paying american
